## SafeGuard STAR

### Adaptable Child Safety

The SafeGuard STAR® provides adaptable child safety for school bus transportation. This five-point restraint system makes the proper and safe transportation of preschool, Head Start and special needs children quick and easy. The STAR is intuitive and simple to use, safely securing and adapting to children of a wide range of sizes and needs.

## The SafeGuard STAR® Product Line

- **Five-point restraint system** easily adjusts to provide a proper and secure fit.
- **Dual cam wrap system** allows for simple, quick and secure seat installation.
- **Installs on** standard FMVSS 222 seats and FMVSS 210 reinforced seats.
- **Simple and easy installation** to the bus seat saves time and money.
- **Seat pad** can be removed and washed without uninstalling the seat.
- **Meets or exceeds all applicable federal and Head Start** safety standards.

“A lot of people felt the restraints saved the children’s lives. Our training on proper use and proper evacuation following an accident was also critical in the positive outcome.”

Judi Mitchell, Family Services/Transportation Manager with Blue Ridge Opportunity Commission Head Start (Wilkes County, North Carolina), explains the importance of the SafeGuard STAR in keeping children safe when a Head Start bus swerved to avoid an oncoming car and flipped over on Jan. 24, 2007. None of the six children in the bus were injured.

### Standard STAR System

- **Easily adjusts** to provide a proper, secure fit for children 25 to 65 lbs., up to 57" tall and over 1 year of age. Meets the majority of transportation needs.
- **The only add-on restraint system** that can be installed three per standard 39" bus seat, helping to maintain seating capacity.
- **Buckle loop feature** helps to avoid touch-related issues.
- **Optional chest strap** provides additional upper torso support and adjusts for a comfortable, secure fit.

### STAR *plus* System

- **Base, comfort pad and shoulder area** are wider to fit larger children, 25 to 90 lbs., up to 57" tall and over 1 year of age.
- **Buckle loop feature** helps to avoid touch-related issues.
- **Optional chest strap** provides additional upper torso support and adjusts for a comfortable, secure fit.

### STAR Special Needs System

- **Additional support features** include an abductor, recline wedge, torso support and adjustable headrest.
- **Easily adjusts** to provide support for children 25-105 pounds with a torso height up to 20 inches tall.
- **Addresses needs related to:**
  - High and low muscle tone
  - Decreased head and trunk control
  - Increased muscle tone in lower extremities
  - Behavioral conditions, such as hyperactivity, autism and emotional concerns
  - Developmentally immature
- **Promotes proper positioning of children with special needs during transportation:**
  - Protects airways
  - Provides support
  - Promotes posture and functional positions
  - Increases comfort
